Fans who pre-order the digital album will instantly receive the new single, “Lover’s Retreat,” plus 19 other tracks, 15 of which were produced, arranged, composed and performed by Jedii. “Take this journey with me and experience pure art that was created with love, inspired by the heart, fueled with passion, layered with soul and baptized in funk.”

Born and raised on the streets of the ATL, the mecca of black music, emerges a mysterious, 100% self-contained industry new comer. After carefully crafting and developing his own unique but familiar sound, Jedii is ready to unveil his art to the world. “My music expresses ideals of love, oneness, passion, mystery, spirituality, sexuality, philosophy, pain, sadness and beauty. My only goal is to touch one person at a time and offer the music selflessly to those who will be inspired.”

The Electric Revival is an album that explores the constant struggle between positive and negative, good and evil. Many of the song lyrics deal with accepting personal truth and how expressing your true self is the path to finding peace and happiness. Notable producers and writers on the project include Mr. DJ on “Truth About U,” “Your Air,” and “Midnight Train.” Shawty Redd helped pen lyrics on “I Tried” and “Moonlight.” The finished product is a collection of songs over a period of time, mostly recorded on an old Mac in his bedroom on a mic with a sock because his art is rooted in working with what you have.

The artist to be known as Jedii, has been working behind the scenes as a hit maker/producer in the music industry for 20+ years creating his legacy, collaborating and writing for artists from Destiny’s Child, Co-ed, Three Six Mafia, Jessica Simpson, Bobby Valentino, Anthony David and Algebra to Common, T.I. and OutKast. “I just want to send out love vibrations and positive energy so strong the whole universe can feel it.”
